

MAINTENANCE

THAT KEEPS YOU MOVING

COMPLETE MAINTENANCE SUPPORT

TrinityRail's maintenance offerings provide exceptional technical expertise and industry-leading turn times. Our shops extend across North America and offer various specializations such as tank car modifications and autorack recertifications.

Our capabilities combined with our engineering and mechanical knowledge ensures you have a reliable partner focused on keeping your fleet running smoothly.

TrinityRail services nearly every type of railcar and need, large or small. We also offer tailored repair and maintenance programs to shippers that own railcars or lease from our fleet, including:

- On-call, qualified field personnel
- Traditional maintenance and repair
- General inspections and certifications
- Modifications, retrofits, and rebuilds
- Mobile repair operations
- Valve qualification and rebuilds
- General cleaning
- Paint and lining
- Maintenance and repair programs

COMPREHENSIVE

Comprehensive coverage begins with our five full-service maintenance facilities, complemented by Mobile Repair Units (MRUs) and on-site services that reduce freight time and expenses.

RETROFITS & MODIFICATIONS

Retrofits and Modifications are offered to provide services essential for operational performance and regulatory compliance.

TURN TIMES

Industry-leading turn times reduce out-of-service time and ensure that your fleet keeps moving.

PARTS

Parts are available from one of North America's leading manufacturer of replacement parts, giving you a single, reliable resource for almost any type of railcar.

FAIR PRICING

Fair and transparent pricing allows us to provide quotes for maintenance and modification before the first car is ever released to a shop.

AUTORACK SERVICE CENTER

Our Autorack Service Center offers specialized railcar services for the automotive industry.

INVESTMENT & GROWTH

Capital investment and growth are our focus for the future as we introduce innovations that meet your needs.

SUSTAINABLE RAILCAR CONVERSION PROGRAM

Our *TrinityRail* SRC® program repurposes and reuses railcar materials and components to sustainably bring renewed life to existing assets.

ADVANCED TECHNOLOGY & SAFETY INVESTMENTS

TERSUS

Robotic cleaning technology that eliminates manual cleaning of tank cars and significantly reduces risks and hazards.

SPONGE BLAST

Automated blast system that improves efficiency and safety.

BATTERY-OPERATED TORQUE MULTIPLIER

Advanced torque verification system that reduces physical effort, requires less time to set up and use, and allows automated recording of torque values.

MOBILE & ONSITE SERVICES

MOBILE RAILCAR CLEANING

- Both tank and freight cars
- Nitrogen purge/pads
- Interior blast (unlined cars only)

TANK CARS

- Top/bottom valve rebuild and test
- Pressure relief valve rebuild and qualification
- Vacuum relief rebuild and certification
- Change of service (gaskets/o-rings)

FREIGHT CARS

- Outlet gate repair and reconditioning
- Hatch cover replacement and repair
- Coaming repair
- Lining inspection and touch-up

ALL CARS

- Preventive maintenance programs
- Draft gear and coupler replacement
- Wheel set replacement
- Exterior paint touch-up

ESG & SAFETY

OCCUPATIONAL SAFETY AND HEALTH CERTIFIED ISO 45001:2018

According to the International Organization for Standardization, ISO 45001:2018 specifies a framework for an occupational health and safety management system and provides companies with guidance to help improve their safety performance.

ENVIRONMENTAL MANAGEMENT SYSTEMS CERTIFIED ISO 14001:2015

According to the International Organization for Standardization, ISO 14001:2015 provides a framework focused on environmental management and specifies the requirements for an environmental management system that organizations can use to help enhance environmental performance.

RESPONSIBLE CARE MANAGEMENT SYSTEMS CERTIFIED RC14001:2015

Designed by the American Chemistry Council (ACC), the Responsible Care® 14001 certification demonstrates a commitment to improving environmental and health performance.

All of *TrinityRail's* United States and Mexico manufacturing and maintenance plants have received the above certifications.
